DETAILED ACTION

1. The final rejection of claims 1-2~~9~~ over **Walker et al.** in view of **Zervides et al.** is hereby withdrawn in view of applicants' appeal brief filed 6/19/2003. Any inconvenience is regretted.

Claim Objections

2. Claims 1, 16, and 20 are objected to because of the following informalities:
Applicant should avoid repeat information given in the title and should avoid using phrases which can be implied "A new and useful ..."

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. 35 U.S.C.101 has two purposes. First, 35 U.S.C. 101 defines which categories of inventions are eligible for patent protection. An invention that is not a machine, an article of manufacture, a composition or a process cannot be patented. See *Diamond v.*

Chakrabarty, 447 U.S.303, 206 USPQ 193 (1980); *Diamond v. Diehr*, 450 U.S. 175, 209

Art Unit: 3628

USPQ 1 (1981). Second, 35 U.S.C. 101 serves to ensure that patents are granted on only those inventions that are "useful." This second purpose has a Constitutional footing — Article I, Section 8 of the Constitution authorizes Congress to provide exclusive rights to inventors to promote the "useful arts." See *Carl Zeiss Stiftung v. Renishaw PLC*, 945 F.2d

1173, 20 USPQ2d 1094 (Fed. Cir. 1991). Thus, to satisfy the requirements of 35 U.S.C. 101, an applicant must claim an invention that is statutory subject matter and must show that the claimed invention is "useful" for some purpose either explicitly or implicitly.

5. Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, particularly, an abstract idea.

The claimed invention is noted not to be a computer program, data structure, a natural phenomenon, and a non-descriptive material per se. Furthermore, the claimed invention do not produce a useful, concrete and tangible result therefore they are nonstatutory. The claimed invention also is not a product for performing a process, nor it is a specific machine or manufacture. The claimed invention is not a specific tangible machine or process for facilitating a business transaction.

Claims 1-20 do not appear to correspond to a specific machine or manufacture disclosed within the instant specification and thus encompasses any product of the class configured in any manner to perform the underlying process. The claimed invention does not include a post computer process activity or a pre-computer process activity. Thus, no

physical transformation is performed, no practical application in the technological art is found. Consequently, claims 1-20 are analyzed based upon the underlying process, and are thus rejected as being directed to a non-statutory process.
